[What is Bootstrap, and how is it used in HTML?]

Bootstrap is the framework that we are supposed to be using while working on our application

This document will offer insight on what the Bootstrap framework is and how its used

What is Bootstrap?

Bootstrap is a popular CSS (cascading style sheets) framework for developing responsive , mobile friendly websites. Currently Bootstrap is in version 4 of its lifecycle. It contains HTML and CSS-based design templates for typography, forms, buttons, navigation and other interface components, as well as optional JavaScript extensions It is strictly designed for front- end use in

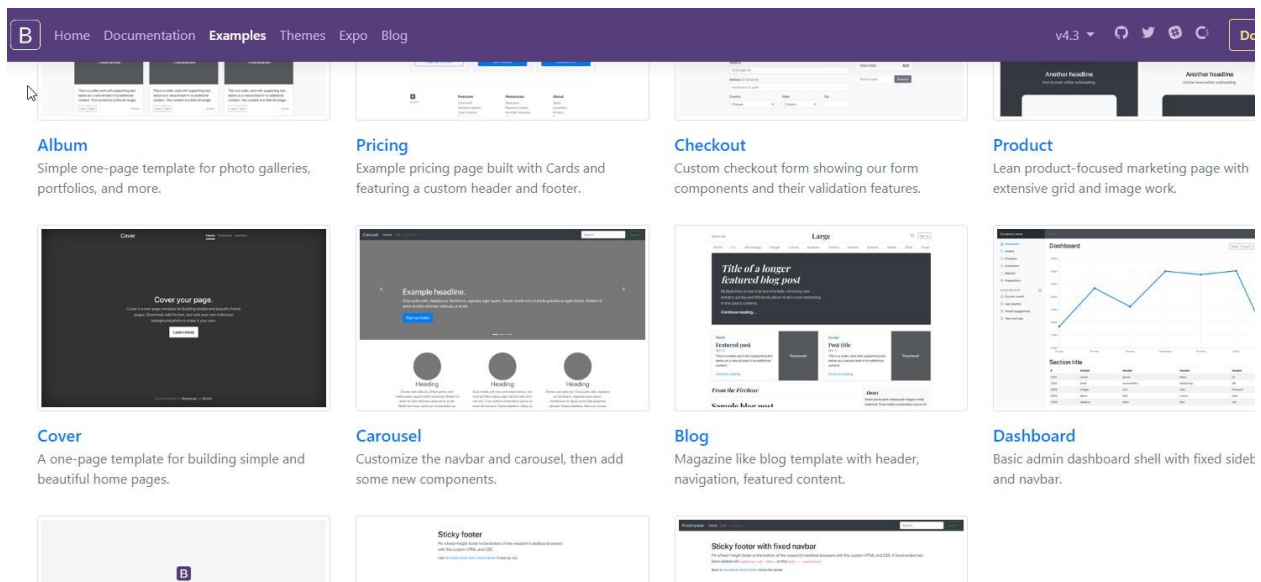

```
<!DOCTYPE html>
<html lang="en">
  <head>
    <meta charset="utf-8">
    <meta http-equiv="X-UA-Compatible" content="IE=edge">
    <meta name="viewport" content="width=device-width, initial-scale=1">
    <title>Bootstrap 101 Template</title>
    <link href="css/bootstrap.min.css" rel="stylesheet">
    <!--[if lt IE 9]>
      <script src="https://oss.maxcdn.com/html5shiv/3.7.2/html5shiv.min.js"></script>
      <script src="https://oss.maxcdn.com/respond/1.4.2/respond.min.js"></script>
    <![endif]-->
  </head>
  <body>
    <h1>Hello, world!</h1>

    <script src="https://ajax.googleapis.com/ajax/libs/jquery/1.11.3/jquery.min.js"></script>
    <script src="js/bootstrap.min.js"></script>
  </body>
</html>
```

the programming world.

How to use Bootstrap

Bootstrap is a downloadable framework, and from there you can integrate the different files into your html. There is another option by which you can use an online reference though a link, but you must be connected to a web server. Bootstrap's website has various examples that you can view and use for your own website design. The best way to learn is to familiarize yourself with the class systems
